

MegaPure

HIGH PURITY HALAR® COATING SYSTEM

Micro-Smooth Seamless Coating

The Ultimate High Purity Coating
For Ultra Pure Water And Chemical Distribution Systems

Serving The Semiconductor/Pharmaceutical Industries

MegaPure

HIGH PURITY HALAR® COATING SYSTEM

Compare The Difference. 5 Times Smoother Than PVDF!

MegaPure

PVDF

PVC

Polypropylene

ADVANTAGES

- No Seams or Welds
- Micro-Smooth
- High Purity
- 80 -100 Mil Thickness
- Non-Contaminating
- UV & Ozone Resistant
- Corrosion Resistant
- Superior Bonding
- Complex Geometrics
- Temperature -105° F to 350° F

Eliminates Welded Seams & Sites For "Bio-Film" Growth

APPLICATIONS

- Polishing Tanks
- Mix Tanks
- Degasifier Columns
- Process Components
- Filter Housings
- "Wet-Etch" Turntables
- Process Tanks
- Pipe and Fittings

Sample Available Upon Request
